

Automation Services

TEAMProjekt is the professional partner at your side. Benefit from more than 35 years of experience in industrial outsourcing.

Outsourcing means for you:

We will take over a process but you don't have to hand it over completely.

TEAMProjekt will develop tailor-made solutions which we will implement with our experienced project teams, even inhouse on your premises. You can rely on the autonomous and sustainable implementation as well as on assurance of operation.

We will deploy our own staff - and the required IT, technology and infrastructure if needed. In addition, TEAMProjekt will add measurable value through digitization and automation. We will advise you already during the design phase focusing on your requirements and goals.

Companies from the producing and manufacturing industry range among our customers nationwide.

Movable or immovable – It's up to you

TEAMProjekt offers different operations models according to the degree of automation and investment volume. Also benefit from our flexible and modular solutions which we have already implemented for numerous clients and integrated in their process environment, enabling us to automate manual subprocesses or even entire production and logistics sectors.

System integration – establishing a good collaboration

A simple way to collect, store, process and prepare production data? For us, that's no longer a vision for the future! TEAMProjekt helps you minimize your planning efforts. We automate process and production management and ensure an uninterrupted workflow of all production and logistic systems with the right interfaces.

Creating Added Value!

TEAMProjekt sorts things out whether you want to increase production, lower costs, improve your product or make the processes safer.
